

2021-2022 CE/CME Program Line-Up

Our current climate provides us with an opportunity to embrace innovative ways of moving forward, challenging our conceptualization of how we engage, educate, and implement CME in the future. The Center for Teaching Support and Professional Development is working diligently to bring you relevant and informative programs in a variety of interactive and hybrid formats.

Nearly all programs are offered at a reduced rate for alumni and preceptors (often free).

Please remember full CME registration and program details can be found at <https://conted.pcom.edu/public-catalog/>. Your clinical preceptors may also join our emailing list by visiting <https://www.pcom.edu/academics/continuing-education/>.
